National Public Seating® and Oklahoma Sound® announce continued investment in Green Manufacturing Practices

For immediate Release—Clifton, NJ—June 2011

As the industry leader in Institutional grade Furniture, including portable Folding Furniture for lunch rooms, training rooms, etc., & Furniture for Worship Halls, Science Labs, Music Programs, Performing Arts, Cafeterias & others, NPS & OSC continue to trail blaze in setting the standard for Environmental stewardship. In addition to minimizing it's eco footprint in the areas of raw material sourcing, energy consumption & air emissions, NPS/OSC is proud to announce a major solar panel installation on the roof of its 200,000 square foot factory facility in its corporate headquarters in Clifton, NJ. Via the installation of a 240KW solar PV system on its roof, we will offset most of the local utility's need to burn oil and gas for electrical production in the public grid and therefore reduce greenhouse gas emissions into the atmosphere. Since we will be generating 80% of the electricity that we use with this system, we cut our carbon footprint significantly.
