

Model # DY50 Folding Chair Dolly

Assembly Instructions

The National Public Seating DY50 Folding chair dolly has been upgraded to maximize your usage and make it most convenient for all of your folding chair storage & transporting needs.

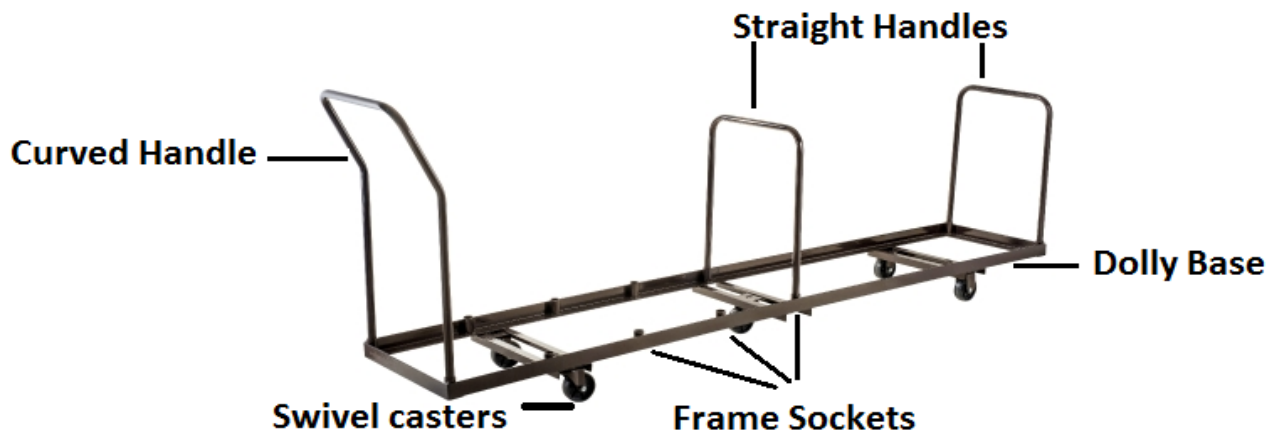

This dolly can be fully loaded to accommodate 50 metal folding chairs. It can also now be partially loaded in such a way that chairs will remain securely in place regardless of how few chairs are loaded.

Before installation, identify the following carton contents:

- Dolly Frame (1)
- Curved Handle (1)
- Straight Handle (2)

Proceed to installation as follows:

1. Remove the three handles from the carton.
2. Insert the curved handle into the sockets at the end of the unit that has the swivel casters.
3. Insert one straight handle into the sockets at the other end of the unit.
4. Proceed to load the desired amount of chairs onto the dolly and place the second straight handle into the pre-set sockets that best fit the amount of chairs that have been loaded. These sockets are located at set intervals on the frame of the dolly.
